CLARIFICATION OF PICTOGRAMS

EN ISO 20471:2013 +A1:2016

3

EN ISO 20471:2013 +A1:2016

X

High visibility safety clothing
The EN ISO 20471:2013 standard lays down requirements for clothing that aims to visually emphasize the presence of the user in order to make the user more noticeable in dangerous situations, both day and night.

X = fluorescence class, reflecting surface, from 1 to 3 (see label for correct class)

	Class 1	Class 2	Class 3
Fluorescent material	0.14 m^2	0.50 m^2	0.80 m^2
Reflective material (required length for 50 mm-wide strips)	0.10 m^2 (2 m)	0.13 m^2 (2.6 m)	0.20 m^2 (4m)

The number next to the icon indicates the class in which the article falls. This depends on the minimum surface area of the fluorescent and reflective material.

EN 343:2019

3
1
X

EN 343:2019 Protective clothing against rain
The EN 343:2019 standard specifies the requirements and test methods for materials and seams of clothing, which protect against precipitation (rain and snow), fog and soil moisture. In the case of work clothing in accordance with the EN 343:2019 standard, waterproofness and water vapour permeability are of the utmost importance. These parameters are always stated with the icon. The seams are waterproofed according to the highest class.

EN 343:2019

X
Y
R

X = Watertightness class, from class 1 to 4

Y = Water vapour permeability class, from class 1 to 4

R = Rain tower test (optional)

EN 1149-5:2018

EN 1149-5:2018 Protective clothing with electrostatic properties
The EN 1149-5:2018 standard specifies the electrostatic requirements for electrostatic dissipative protective clothing to prevent flammable discharge.

EN 13034:2005 +A1:2009

Type PB (6)

EN 13034:2005+A1:2009 Protective clothing against liquid chemicals
This standard establishes the requirements and test methods for type 6 chemical protective suits, both single-use suits and reusable suits. Type 6 clothing is clothing that offers limited protection against small splashes or a light mist of chemical liquids. In general, this clothing will be made of liquid-repellent, but not completely liquid-tight materials.

STORAGE REQUIREMENTS

The clothing should be stored in a clean, cool and dry place and not kept compressed in the original packaging. Do not expose the clothing to direct sunlight. Never store the clothing wet; always allow it to dry hanging first. Make sure that the packaging and the clothing are not damaged when shipped.

TESTING INSTITUTE

This garment is certified by: AITEX (Notified Body no. 0161), Plaza Emilio Sala, 1 Alcoy (Alicante) 965542200, Spain.
