High-visibility safety clothing

The EN ISO 20471:2013 standard specifies the requirements for clothing that aims to visually emphasise the presence of the user to make him stand out more in dangerous situations, both day and night.

X = class of the fluorescent reflective surface, ranging from 1 to 3 (see label for the right class)

	Class 1	Class 2	Class 3
Fluorescent material	0.14 m^2	0.50 m^2	0.80 m^2
Reflective material (required length for 50 mm-wide strips)	0.10 m^2 (2 m)	0.13 m^2 (2.5 m)	0.20 m^2 (4 m)

The number next to the pictogram indicates under which class the article falls. That depends on the minimum surface of fluorescent and reflective material.

STORAGE CONDITIONS

The clothing should be kept in a clean, cool and dry place and not kept compressed in its original packaging. Do not expose the clothing to direct sunlight. Never store the clothing wet, always hang it to dry first. Make sure that the packaging and the garment are not damaged during shipping.

TESTING INSTITUTE

This clothing is certified by: Centexbel (Notified Body no. 0493), Technologiepark 70, BE 9052 Ghent, Belgium.
