High-visibility safety clothing

The EN ISO 20471:2013 standard specifies the requirements for clothing that aims to visually emphasise the presence of the user to make him stand out more in dangerous situations, both during the day and at night.

X = class for the fluorescent reflective surface, from class 1 to 3 (see label for correct class)

	Class 1	Class 2	Class 3
Fluorescent material	0.14 m ²	0.50 m ²	0.80 m ²
Reflective material (mandatory length in 50 mm wide strips)	0.10 m ² (2 m)	0.13 m ² (2.6 m)	0.20 m ² (4 m)

The number next to the pictogram indicates under which class the article falls. That depends on the minimum surface of fluorescent and reflective material.

STORAGE CONDITIONS

The clothing should be kept in a clean, cool and dry place and not kept compressed in its original packaging. Do not expose the clothing to direct sunlight. Never store the clothing wet, always hang it to dry first. Make sure that the packaging and the garment are not damaged during shipping.

TESTING INSTITUTE

This clothing is certified by: AITEX (Notified Body no: 0161), Carretera Banyeres nº 10, 03802 Alcoy, Spain.
