

M-Safe 4183 anti-trauma strap

- Highly effective, specially designed to reduce the negative effects of "Suspension Trauma"
- Compact and light-weight Does not hinder the user during the performance of work
- In situations where the user has fallen, the anti-trauma strap ensures that the fallen person himself can make sure that the blood circulation is recovered and/or maintained. Naturally, the person concerned must be conscious
- Easy to attach to the harness using the textile loop and velcro strap
- Easy implementation

Art.No.: 8.84.183.00
