

Technical Data Sheet

Release Agent Dexcoat 2W

Dexcoat 2W is designed as a general release agent for epoxy, polyester, vinyl ester, phenolic and other thermosetting resins.

Dexcoat 2W is an advanced polymeric resin in water. It provides a durable film capable of giving many releases per application and will not contaminate the released surface.

Advantages:

- Easy application
- Water based
- No odour
- No mould build- up
- Can be used on all mould surfaces
- Durable; provides multiple releases per application

Properties:

Appearance:	milky, liquid
Coverage:	20- 25 m ² /l
Shelf life:	1 year

Application:

Remove all traces. The mould should be clean and dry before used.

Dexcoat 2W can be applied by cloth, brush or spray gun. Allow a decent drying up time before starting moulding.
