iGUIDE Method of Measurement

Definitions

Interior Area is a per floor calculation, made by measuring to the inside surface of the exterior walls. The footprint of all interior walls and staircases is typically included.

Excluded Area is a sum of the area of all rooms (measured to the inside surface of room walls) that are excluded from the Interior Area for a floor and the footprint of corresponding walls. Prescribed area exclusions can vary from region to region. Examples of exclusions are spaces open to below, garages, cold cellars, crawl and reduced height spaces.

Exterior Wall Footprint is the sum of the estimated area of the perimeter wall segments bounding both Interior and Excluded Areas.

Exterior Area is a per floor calculation, made by measuring to the outside surface of the exterior walls and is represented by the sum of the Interior Area and the Exterior Wall Footprint.

Grade is the ground level at the perimeter of the exterior finished surface of a house. A floor is considered to be above grade if its floor level is everywhere above grade.

Total Interior Area is the sum of all Interior Areas.

Total Excluded Area is the sum of all Excluded Areas.

Total Exterior Area is the sum of all Exterior Areas.

Finished Area is a per floor calculation made by adding all enclosed areas in a house that are suitable for year-round use based upon their location, embodying walls, floors, and ceilings and which are similar to the rest of the house. Footprint of walls is attributed to finished area only when the walls are bounding finished areas.

Unfinished Area is a per floor calculation made by adding all enclosed areas that do not meet the criteria for Finished Area. Exceptions are outdoor and non-walkable areas, for example porches or areas open to below. Footprint of walls is attributed to unfinished area only when the walls are exclusively bounding unfinished areas.

Notes

For exterior walls that are adjacent to the outside of the property, where typically only the interior side has measurement data, an estimation of the exterior wall thickness (as directly measured at the property) is used to calculate its footprint. Considerations are not made for varying wall thickness along the perimeter.

Disclaimer

All dimensions and floor areas must be considered approximate and are subject to independent verification.

Failure to obtain a parking permit and display the permit or permit number on the vehicles' dash may result in a Town of Collingwood parking violation ticket and/or the vehicle being towed at the owner's expense.

Parking permits may be valid for up to 3 days at a time and a total of 12 days per month. A resident may request that this time be extended by contacting the property management company. Any extension request will be dealt with on a case-by-case basis.

There are 171 units and significantly less visitor/guest parking spots; the issuance of a parking permit does not guarantee your visitor or guest a parking spot. Only one permit will be issued to a resident at any one time.

Parking in a visitors parking spot is at the vehicle owners risk and the Condominium Corporation is not responsible for any loss or damage no matter how caused; and

- vii. No person shall park or use a motor vehicle in contravention of these Rules, otherwise such person shall be liable to be fined or to have their motor vehicle towed from the Condominium in which event neither the Corporation nor its agents shall be liable whatsoever for any damage, costs or expenses whosoever caused to such motor vehicle or to the Owner thereof.
