

**EXIDE SHARE
PRICE TARGET
2024, 2025 TO 2030**

WWW.INDIAPROPERTYDEKHO.COM

Exide Industries Limited, a leading figure in the Indian battery sector, holds a substantial position in the market with a varied range of products including those for the automotive, industrial, and marine sectors. As market watchers closely monitor the stock market for chances of expansion, Exide's shares have attracted interest. This piece will delve into the Exide Share Price Target 2024, 2025, 2026, and 2030, along with projections and estimates that could assist investors in making well-informed choices.

Looking forward, the Exide Share Price Target 2025 is projected to be between ₹300 and ₹350. The company's dedication to innovation and sustainability, along with its growing presence in the renewable energy sector, is expected to be key factors in reaching this goal. Exide's strategy to launch new battery technologies, including lithium-ion batteries for electric vehicles and renewable energy storage solutions, is poised to drive expansion.

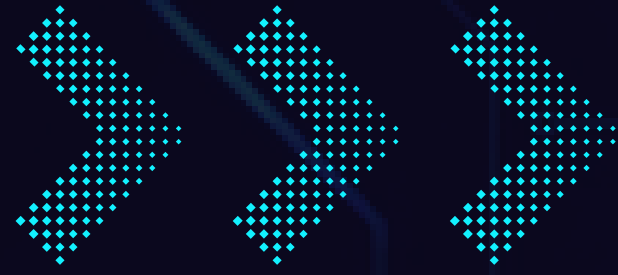

Looking ahead to Exide Share Price Target 2030, it's anticipated to range from ₹500 to ₹600. By this period, the company is projected to have a solid foothold in the electric vehicle battery sector and other growing areas. The growing adoption of electric vehicles, in combination with the rise of renewable energy storage technologies, is expected to drive a significant demand for Exide's offerings.

In summary, the Exide Share Price Prediction from 2024 to 2030 appears to be positive, driven by the company's strategic emphasis on innovation, growth, and environmental sustainability. As the demand for energy storage solutions and electric vehicle batteries is on the rise, Exide Industries is in a strong position to seize these opportunities, presenting a promising outlook for investors.
