A moviemaker is just not a money maker. He has some responsibilities. These increases when he goes for an international product. Apart from something which makes a movie a complete entertaining package, My heading says many issues which are as follows:

1. Bangladesh (BD) is country of 16 crore. So, you understand how much it will be in terms of movie viewers number. The movie portrayed BD like Syria, Afghanistan or a war wrecked State which is disgrace for us. Because BD is not stuntman (Director) should have some background studies which hadn't. Because he is a stuntman!
2. He couldn't portrayed our law agencies properly and made whatever just he liked.
3. He could not portrayed Dhaka. Because he tried to do it from Ahmedabad, India.
4. There is distinct difference between the Bengali language of BD & India as it's between US & UK English language in terms of pronunciation. Someone apart from Bengalis may not understand it. The stuntman tried to establish Indian Bengali language as BD Bengali language with lot of spelling mistakes of Bengali language

which made the background as unrealistic one.

5. It's obvious that the Stuntman took idea from Someothers not from BD to portray BD as he didn't come here. This made the blunder and has defamed my country.

6. You will need a microscope to find out a man having 4 wives in BD. It may be possible in Middle East. But it's reflected in the is how he tried to defame BD muslim culture.

Thereby I am grading this movie 1/10.

Awesome fight scenes. Action non-stop. Decent plot. Loved it.
