Maleficent mistress of evil soundtrack. Maleficent mistress of evil on netflix. Having enjoyed the first movie, I had to obviously check this sequel. The main story is not more than a Disney cliché: two young persons in love that somewhat find themselves in a situation that may break them apart forever. The first movie was much more powerful as it did not follow any previously written cliché. Anyway, the movie has good points, excellent acting by Angelina and the rest of the cast in general. Apparent lack of performance by the prince and king, but that's ok. Graphics are amazing, overall. What triggers me most is the end. I understand this is a movie for children, but the end is just baffling. First of all, the "war" seems to be too much. The fairies have no plan whatsoever, besides flying around and grabbing some guards, whilst they're destroyed by the red power. The Maleficent transforms into a Phoenix but that doesn't help much - actually, it seems to impair her ability to save the princess from the fall of the castle, as she has become clearly heavier and less agile. In the end, after lot's of killings, the castle is essentially destroyed, but everyone gets to be friends in the end, and the wedding proceeds. It just doesn't add up. The Queen, after all the negative stuff she did, is only transformed into a goat. Overall, I believe a more cohesive end would make this movie more enjoyable. Anyway, if you're a fan, don't lose the chance to watch it.

Maleficent mistress of evil netflix. This film tells the story of a kingdom threatened by a fairy land.

The story is simply great. It is engaging and takes you through many emotions. The characters are amicable and makes you care about them. Without spoiling the story, I even find myself looking forward to the reappearance of a supposedly evil character. The visuals are beautiful, and I just love everything in the film.
