Middle East and Africa Automated Border Control Market Reports

Data Bridge Market Research analyses the Middle East and Africa automated border control market will exhibit a CAGR of 16.4% for the forecast period of 2021-2028.

The automated border control (ABC) system is a global security solution for border crossings. It is an integration of automatic self-service barriers and biometric devices that store personal biographical data to verify the identity of passengers. E-gates are utilized as an automated border control system at airports, which is referred to the physical form of gates that helps in controlling immigration in the event of an identity mismatch.
