I have watched some disturbing films in my time but this was a belter for disturbing and not even in a good way. It was like the director came up with a really messed up idea and his colleague's decided to just add to it with more messed up ideas. I watched it to the end to see where it went and it just went from bad to worse and beyond. Do yourself a favour and avoid this film. It's a waste of time and will leave you sat puzzled and disturbed.

There are many times when you avert your eyes from the screen. One can overlook such depravity (think Tarantino, Scorsese) if there is a substantial story justifying the violence. While Midsommar does have a story it is told in a prolonged laborious fashion. One could easily edit an hour-plus from this movie and not miss a thing. The dialogue is lacking and the acting leaves much to be desired. If you enjoy weirdness for its own sake it may be possible to enjoy this movie.
