Marc Flint's

A.S.C.E.N.D.O. Method

for quick, easy and affordable Website **Creation and Maintenance**

STRATEGIZE

We will create the perfect website

solution based on your goals, budget,

and business strategy needs. Tailored to

where you are in your Success Journey and where you want to go.

With this feedback and your wishes in mind, we then optimize, tweak, and nurture every detail until your website is perfect and ready to be launched.

your Online Success together.

EVALUATE

After we showed you what we created, we will then together go through everything, take note what you want to have added, changed, or optimized. Text, Images, Colors, User Experience.

We then create your stunning, professional website with Worldclass design, state-of-the-art functionality, and everything we agreed upon in our strategy for your online presence.

ONGOING SUPPORT

We keep your wonderful new website up and running. We host it on reliable servers, make sure it's safe and secure, that all automations work properly and your desired updates are implemented.

ASSESS

In our first Meeting, we will speak about your current online presence, analyze your market, customer profile, and business goals, and get a clear understanding of the Status Quo.
