

Faced with life's cruel irony, the unpredictable stories of a well-dressed pair of low-level hitmen; a gangster's statuesque moll, and a double-crossing prizefighter become inextricably intertwined, as the small-time crooks, Honey Bunny and Pumpkin, summon up the courage to hold up their favourite L.A. diner. Entrusted with retrieving a glow-emitting leather suitcase which belongs to their boss--the powerful crime kingpin, Marsellus--instead, the dark-suited gunmen, Vincent Vega and Jules Winnfield, end up with a bloody mess. Fortunately--with men like Mr Wolf always around to handle a crisis--there's time to cool off in a long twist contest, while at the same time, the proud champion boxer, Butch, makes the decision of a lifetime. Soon, things will come full circle, as, once more, Jules and Vincent find themselves in the perfect dead-end situation, exactly where it all began: an all-too-familiar cafeteria. Is truth stranger than fiction?

For a film that's not about much or anything in particular at all, it's incredible just how much of a mark the at the time largely unknown Quentin Tarantino's film has made on the industry with line upon line of memorable and endlessly quotable dialogue, it's perfectly pitched dark humour and a collection of characters that've made their way into popular culture from bible quoting hit-man right through to a leather clad gimp.

Pulp Fiction is well and truly a one of a kind movie, a film born out of the imagination of Tarantino and his co-writer Roger Avary that could never be imitated or matched no matter how many times the imitators would try (and there have been many) and as time continues to ever so surely tick on from its original 1994 release that would see the film not only win the Canne's Film Festival's Palme d'Or but be nominated for 7 Academy Awards in which it won Tarantino his first ever Oscar (for Best Original Screenplay) it's a testament to the everlasting value of the film that it continues to be such a joy to watch these 22 years later.

The 154 minute film still wizzes by on the back of its unending supply of quick witted jokes and bizarre circumstances, while its eclectic group of characters who sometimes run across each other's paths for better or worse are well and truly as fun as they could've ever been, whether they be likable or not. Pulp Fiction really did once and for all set in concrete the talents of Tarantino as the writer and director of actors, as his venture to the sun bleached streets of LA resurrected and redefined a number of careers with its success.

It's been well spoken about for a number of years at just how important Pulp Fiction was to the at the time stagnating careers of John Travolta (who got to dance his way back into stardom) Samuel L. Jackson and Bruce Willis but Tarantino showcased his chops as a leader of talent by injecting this wild tale with memorable turns (however brief) from the likes of Uma Thurman, Tim Roth, Harvey Keitel, Ving Rhames and even Christopher Walken. It's a star-studded cast no doubt, but Tarantino handles each one of them perfectly and they show unbridled happiness getting to deliver his and Avary's home run hitting script right out of the park. As a movie fan you've likely seen Pulp Fiction numerous times (I know I have) and there's very little that could be said in an argument

against its joys as a cinematic trip like no other. A film joy ride you'll be taking for years to come, Pulp Fiction is deserving of its classic regard and spot on many a film fans top 10 lists. Not too bad at all for a film with nothing but an endlessly mysterious briefcase tying it all together.
5 bare feet out of 5.

Watch Movie Pulp Fiction (1994) Online Free Full Movie No sign up to receive. I think Pulp Fiction is one of the best films out there! I loved Kill Bill 1 and 2, and Reservoir, but wasn't as keen on Jackie Brown. I love this infantile humour Tarantino has in his films, from the accidental killing of Marvin, to the bewildered Vince and Butch. I love how the film is produced. The way the narrative is constructed or in a way re-constructed (in classical terms) is brilliant, and clever. It keeps with the kind of audience Pulp Fiction was made for; this television slob, who sits there and watches this "rebel with a pause" television- these are the type of "heroes" Tarantino loves. I don't really care about the plagiarism used in the film, or any film (inless its Van Helsing) i mean we see it every day in every film we see! No contemporary director has stood there on the set and thought ah yeah, no ones EVER done that before, because they get ideas from what they have seen in other films, i mean no one complains when The Simpsons do "homages" towards films like Battleship Potemkin, or Psycho, i mean The Simpsons paid "homage" to Tarantino 25 times! Honestly! Just shows hes better.
