MVP SCENARIOS:

MVPs: a minimum viable product has just enough core features to effectively deploy the product, and no more. Project developers typically deploy the product to a subset of possible customers— such as early adopters thought to be more forgiving, more likely to give feedback, and able to grasp a product vision from an early prototype, marketing, or promotional information.

This strategy targets avoiding building products that customers do not want and seek to maximize information about the customer with the least money spent. The technique falls under the Lean Startup methodology as MVPs aim to test business hypotheses, and validated learning is one of the five principles of the Lean Startup method. With the SPORTREX decentralized eSports and gaming ecosystem as indicated below. We have carefully researched and resolved to develop these products base on users and feedback reviews across the globe.

The SPORTREX project includes a gaming ecosystem, prediction market, Metaverse platform, and NFT and Art Collectibles Marketplace. The full SPORTREX MVPs and Features will be discussed throughout the document.

PREFACE

“The birth of a **Revolution**”

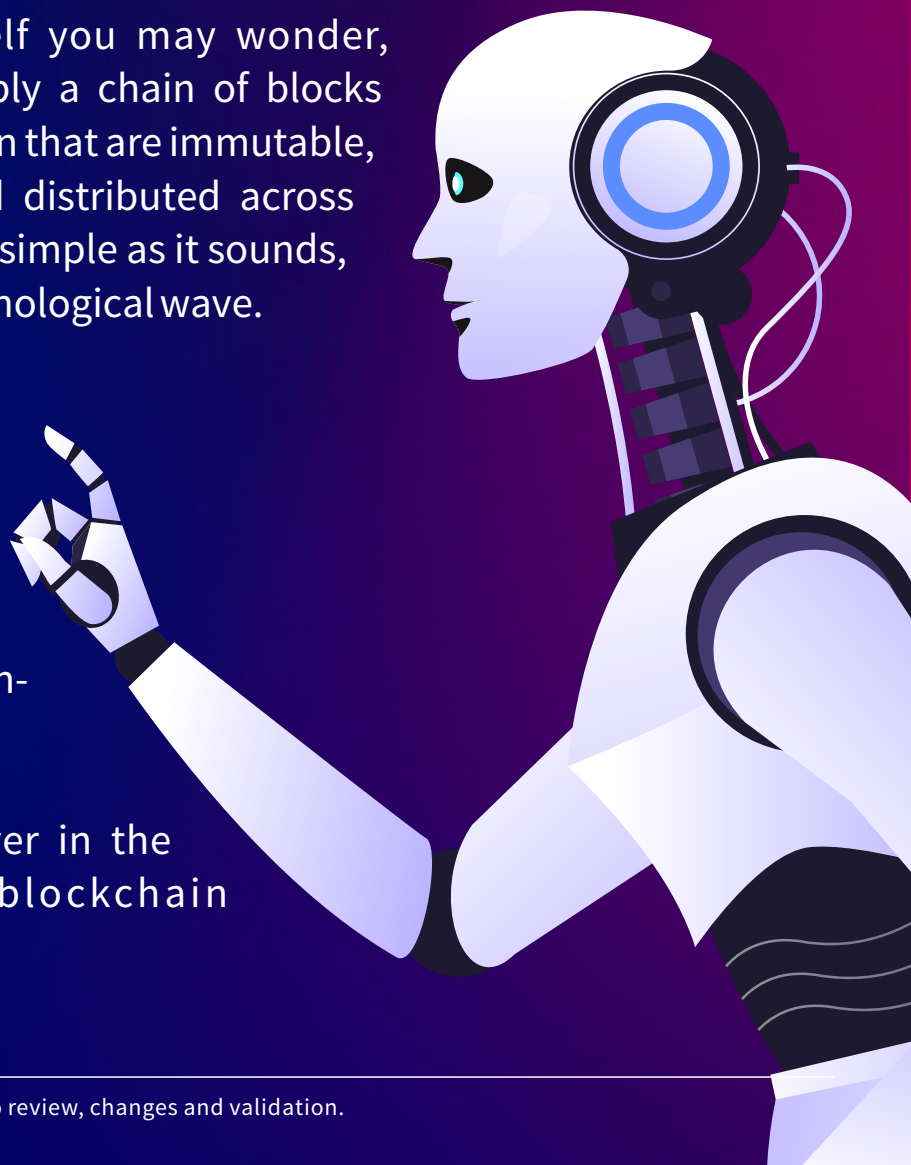

If you are up to date on trends and happenings, then the term “blockchain” is one you are most likely familiar with.

Since the first use case of this technology, we’ve witnessed the birth of a revolution changing the norm across all industries. The change began with cryptocurrency and now has evolved into various innovations. We have DeFi (Decentralized Finance), NFT (Non-Fungible Tokens), and the Metaverse. All these innovations have changed our lives forever.

What is this technology itself you may wonder, blockchain technology is simply a chain of blocks containing pieces of information that are immutable, tamper-proof, duplicated, and distributed across computer system networks. As simple as it sounds, it is the bedrock of the new technological wave.

Currently, the gaming ecosystem is at the forefront of the movement, with the play-to-earn model where players can convert in-game earnings to real-life income and hold in-game assets with real-life value.

Indeed, gaming is a key driver in the mainstream adoption of blockchain technology and its innovation.

INTRODUCTION

"A gateway to a world of limitless possibilities"

"A virtual doorway to rewarding entertainment and unrivalled immersive experience"

INTRODUCTION

Sportrex is an all-in-one decentralized GameFi (Play-to-Earn) ecosystem built on multichain networks with Metaverse experience.

Sportrex is a gaming and eSports ecosystem built on blockchain technology. We are spearheading the revolution of what entertainment and immersive experience should be.

Blockchain gaming is no longer a new concept, with games like Axie Infinity and Sandbox being a household name within and beyond the cryptocurrency ecosystem. The only challenge is that most of the blockchain gaming platforms are limited to a particular game, some substituting quality gaming experience for users' monetary gains. Although they truly build solid reward structures for gamers but in return, affect the fun and excitement that comes with gameplay.

Keeping this in mind, Sportrex is deviating from the norm. We are shaping the future of smart gaming in a way you have never seen, or experienced. Our gaming platform is built to empower all gamers, with no restriction to any game, therefore allowing them alternate gameplays and activities while enjoying financial gains.

Also, Sportrex is home to hundreds of games, competitions, and tournaments. We have diversity ranging from board games to the most popular video games with the kid's zone offering highly educative and enlightening games for children.

One would think it ends here but there's more. Sportrex has a “predict and win” section for every game, both live competitions like football, basketball, car race, and other sporting activities and in-game tournaments like chess, video games, and card games. Here, winners earn tremendously for predicting an outcome correctly.

In addition, Sportrex has a hyper-realistic 3D immersive space where humans represented by avatars can play, socialize, interact and own assets. Also, an NFT Marketplace which serves as a bridge between digital works creators, and collectors.

OUR MISSION

Sportrex is committed to building a thriving platform for gamers and all categories of users. It is our mission to create an ecosystem filled with profitable, exciting, and immersive experiences.

OUR VISION

To build a unique play-to-earn model
and revolutionize the world of

Take your position with us, Today!

LP “LIQUIDITY POOL” EMPIRE

“Provide Liquidity and earn BIG”

As SPT is the sole means of value transfer over our protocol, most transactions and gaming activities will consist of two swaps within our liquidity pools. By providing liquidity to our pools, you will enjoy fees that the SPORTREX gaming ecosystem and API will generate from our network of integrated partners.

Earn rewards by providing liquidity: We are giving away 10,000,000 SPT tokens to liquidity providers via a Special Rewards Scheme. The earlier you deposit your liquidity, the higher your multipliers!

SPORTAGE (COINED FROM THE WORD “MORTGAGE”)

Sportrex provides countless opportunities for the empowerment of our community. One of them is the mortgage plan.

Introducing the first-ever Mortgage protocol with a hybrid yield mechanism for Gamers, Athletes, Artists, Creators, Influencers & Brand Ambassadors, globally. This product and initiative allow them access to a mortgage plan.

Every user has the opportunity to create their own dreams by leveraging this protocol. By holding a piece of the #SPT tokens to enjoy this lifetime privilege.

GAMEPENSURE (COINED FROM THE WORD “PENSION”)

Sportrex goes beyond providing a simplistic play-to-earn model. Our platform offers all gamers access to a pension plan. We believe gaming should be seen beyond the leisure that comes with it and the thought of old age or retirement should not deprive anyone of living their dreams.

That's right!

Our GamePensure plan gives users a chance at long-term financial security. It provides long-lasting investments and passive income opportunities.

Every token holder has access to this unique feature.

DECENTRALIZED CLOUD GAMING

In recent years, the cloud gaming market has entered the spotlight with experts believing it will be worth \$450 million by 2023. Decentralized Cloud Gaming is the next big thing, a smart solution for Gamers, Blockchain enthusiasts, Creators, and Cryptocurrency fans. Currently, for gamers, cloud gaming is 10x cheaper than owning personal gaming hardware (PC/console), leveraging share economy principles.

The development of GPUs, the Internet, and low-latency streaming, have diminished the demand for personal gaming hardware. In fact, the next generation of consoles could be the last one that is based on hardware. Moving gaming into cloud technology has now become inevitable – over **75%** of Steam players are unable to play AAA titles like GTA V in high resolution, and **25%** of players cannot even run such titles on their obsolete PCs.

The demand for latest-generation hardware, and the increased requirements from gaming caused by resource-intensive VR technologies, will be making home hardware more and more expensive and non-viable for casual gamers. Indeed, the demand for cloud gaming will continue to grow.

Also, it will serve as a convenient platform for miners to rent out their hardware and contents with our API strategic feature. Easy way to play-on-demand on the powerful gaming rigs for gamers.

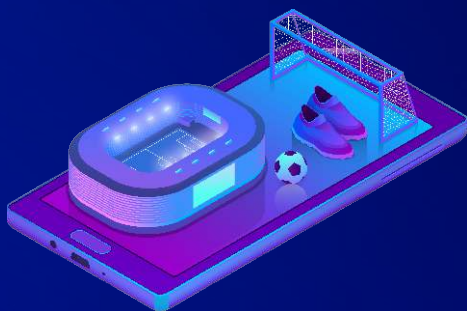

YOU cannot afford to miss this New History-making project with great opportunities. Sportrex is primed to make the ecosystem profitable for all gamers on our platform.

KIDS GAME ZONE

We meant it when we said Sportrex was for every gamer out there. Our kid's game zone is designed to appeal to all the young gamers out there. At Sportrex, they can access educational yet exciting games known to boost IQ, increase mental capability and elevate intelligence.

All our kiddies' games are informative and real-world simulated. These features help kids in school and in their understanding of the world.

DEFI MATCH MODULE

“Upgrade your Game plan with Sportrex DeFi Match Module”

Since its inception, tens of billions of dollars worth of crypto has flowed through DeFi applications and it's growing every day.

DeFi (Decentralised Finance) is an open and global financial system built for the internet age – an alternative to a system that's opaque, tightly controlled, and held together by decades-old infrastructure and processes. It gives you control and visibility over your money, exposure to global markets, and alternatives to your local currency or banking options.

“The SPORTREX – DeFi platform will host a variety of DeFi-fueled eSports adrenaline.”

With our unique De-fi match module, we connect gamers to the best financial services. The SPORTREX - DeFi products open up financial services to anyone with an internet connection and they're largely owned and maintained by their users.

The Sportrex Defi platform offers all users access to services such as the Defi match pool, staking, gaming stop loss, and other features. Each feature equips users with the chance to diversify their income and earn passively.

Also, all users can compete with opponents from around the world in a first-of-its-kind DeFi low stake P2P challenge.

Game your way to the top irrespective of winnings or loss with these steps:

DeFi Match Pool:

Players can host matches of any token combos they wish, use the recommended or promoted pools to receive extra rewards, or know they are receiving the highest rewards possible when you play to see who will leave with the bigger bag.

New DeFi Gaming Models:

Using DeFi protocols we can supersede previous gaming models when combined with valuable assets. No longer will losers feel like losers, as their tokens are locked into positions with added SPT token bonuses plus the rewards offered by the pools their tokens end up.

DeFi Gaming Stop-loss:

Using high APY pools and letting users pick how much of their collateral bag will be forfeited if they lose with a range of percentages, from 1% to 50%. Combined with extra rewards for locking your crypto in the pool for the full duration, users will be able to judge how much they are willing to lose, and how long it may take to get it back.

FANS REWARDS PROGRAM

“Be more than a FAN, convert your passion to monetary gain”

We believe passion should be recognized and that every fan has the right to make their voice heard, wherever they are in the world. As such, we are building an end-to-end solution for building blockchain-based loyalty networks to increase profits and user retention with the world's largest decentralized rewards and loyalty token. Users will be rewarded with loyalty tokens added to their wallets, while businesses can create new revenue streams. Therefore, influence your team, access VIP rewards, and exclusive promotions, and join a global community of superfans.

Also, hold our native token (SPT), Refer your Friends & Win more **\$SPT**.

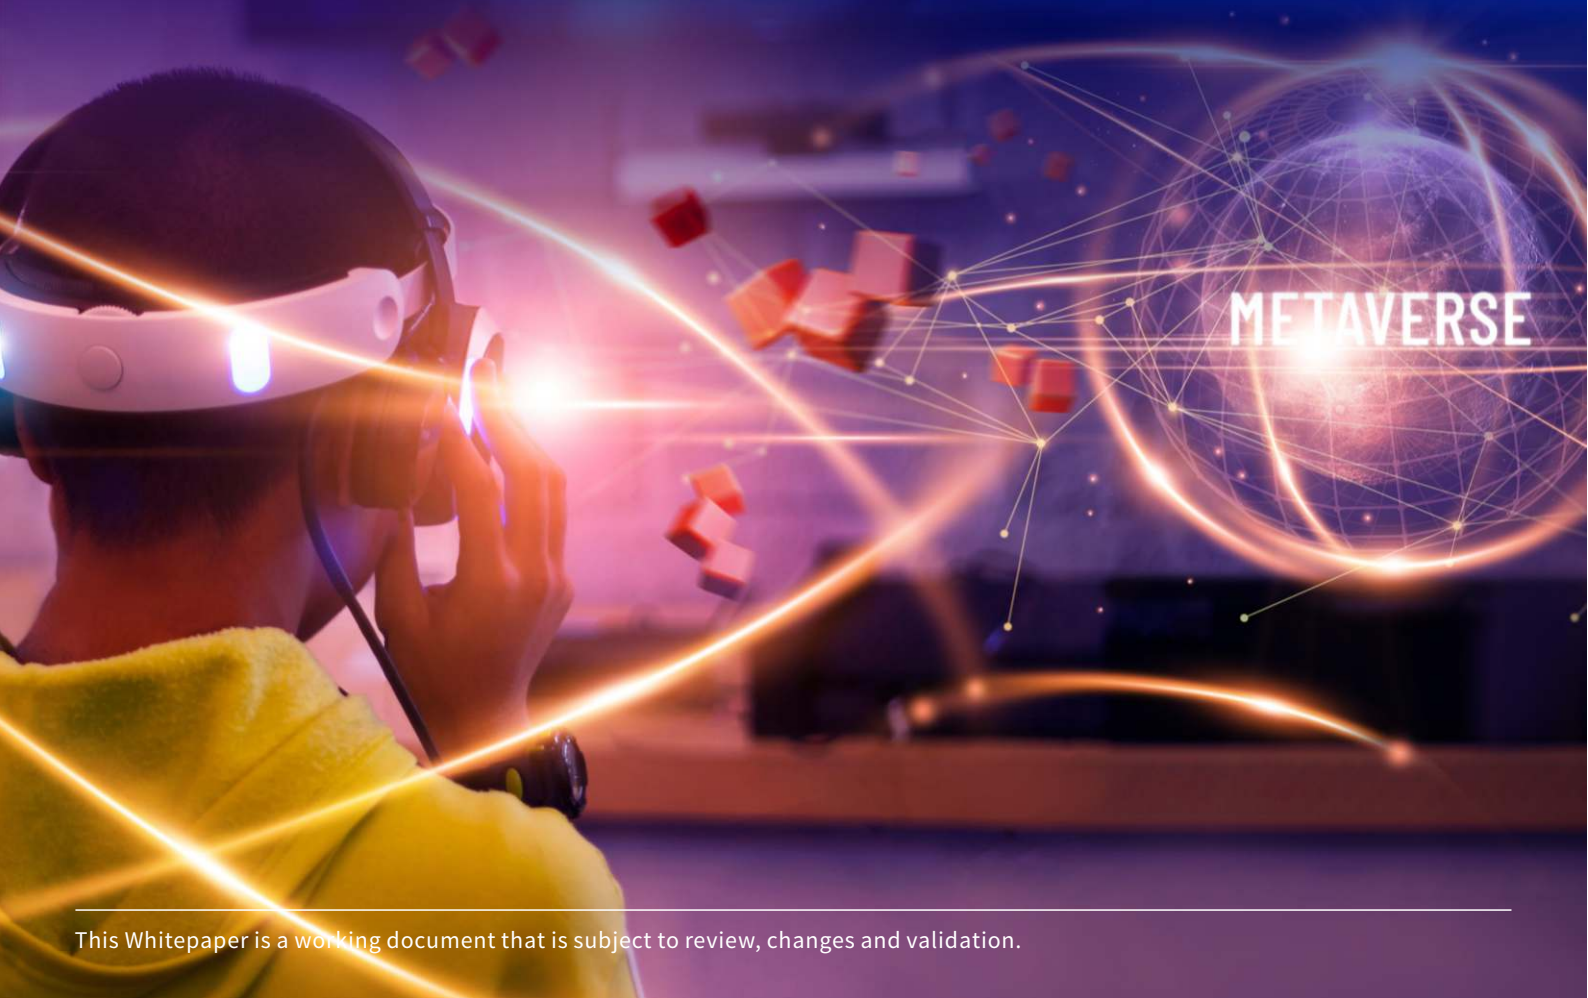

Put your networking skills to financial rewards, from hunting tokens in groups to discussing your preferred poll options and influencing your club collectively, SPORTREX community is much better with friends.

DISTRICT 2 - SPORTVERSE (METAVERSE)

"A reality like

DISTRICT 2 - SPORTVERSE (METAVERSE)

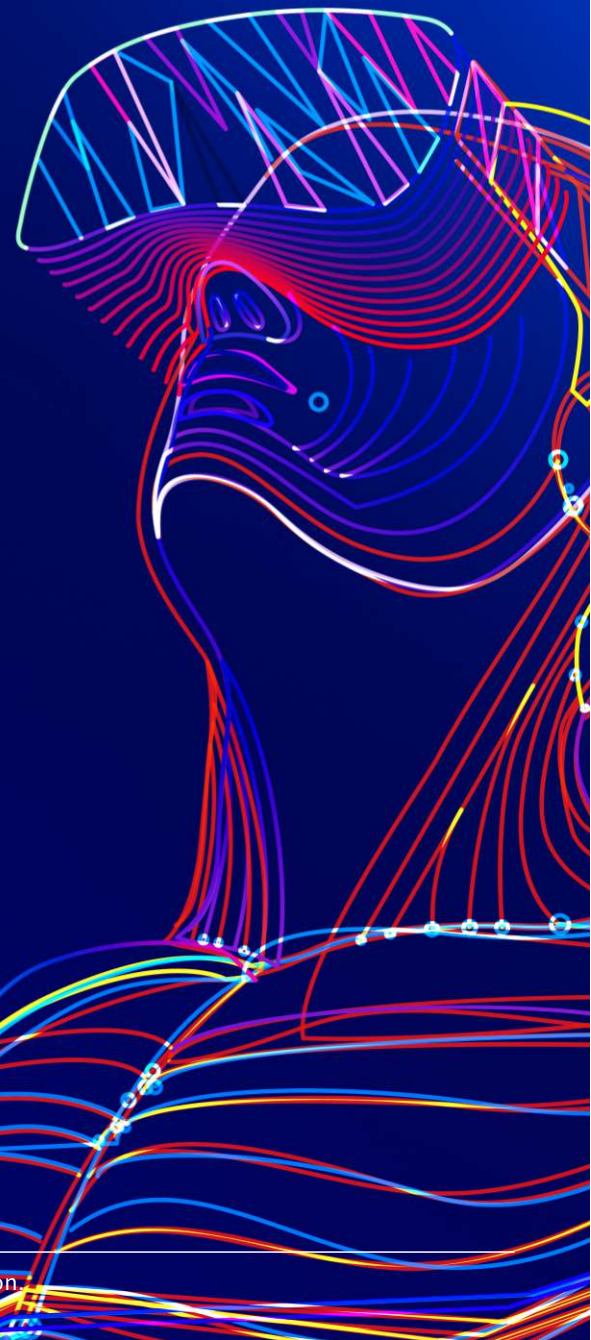

Metaverse became a household name when Facebook renamed itself as Meta, and this drove some misconception around Meta meaning Metaverse. Well, this is not the case.

The metaverse is a virtual reality space where humans can design life as they want it. You can interact, socialize, work, earn and carry out day-to-day activities in a user-centered environment.

The sportVerse is a hyper-realistic 3D virtual reality world. It is a gateway to the seamless implementation of every user's imagination. Our immersive ecosystem serves as an extension of the universe and offers a complete sense of existence from entertainment to commerce.

You might have experienced other metaverse platforms, but SportVerse, the first-ever smart city is undoubtedly the first of its kind. The only limitation to what is achievable on SportVerse is your mind. As long as you can see it, you can build it.

Welcome to SportVerse, an immersive reality where all your imaginations are born through seamless builder tools engineered with easy navigation in mind.

EXPERIENCES

"The gallery of dreams"

SportVerse is a gateway leading to a world powered by your imagination. A world designed to allow you structure your life as you want it. The moment you step into our immersive reality, you are engulfed with a new air of possibilities, as the limit to what is possibility is only in your mind. We offer a wide range of events and several benefits to all categories of users from brands, to creators, influencers, and consumers.

With SportVerse, as long as you can think it, you can build and live it.

SPT TOKEN UTILITY

“The facilitator of the platform protocol’s unique transactional functionality”

The **\$SPT token** is the native token of Sportrex and is responsible for powering the ecosystem. It is the only means of value transfer between parties over the protocol and can be converted to/from any other cryptocurrency or fiat. The token will initially be developed as a BSC and ERC20 compatible token over multi-chain layers network for easy interoperability and faster blockchain interaction (SPT V1.0).

This will facilitate the MVPs as well as the initial usage of the token as a means of payment on our Launch Partner’s platforms from day one. In the Sportrex ecosystem, \$SPT is used to play games, collect winnings, trade NFTs and even participate in yield farming. To successfully earn on the Sportrex platform, the user is expected to own the \$SPT token. In fact, there are rewards for holding and staking the native token of the Sportrex ecosystem.

SPT TOKEN UTILITY

To ensure the long-term scalability of the project and to meet potential needs of the community, we may decide to migrate the SPT token by either upgrading it or moving to multiple blockchain. At every migration process; a formal announcement will be released on our website and through our official social medium channels. All SPT holders will have the ability to convert their V1.0 token to the new version. In case of such a migration, all necessary guidance and tools will be provided in our Github repository. The final and total supply of tokens will be issued in the SPT and there will be no future addition to this amount, no increment will be made whatsoever.

\$SPT provides access to all Sportrex activities and features.

In addition, the SPT token has secured liquidity due to its unique ecosystem and varied utility. Due to this fact, participation in liquidity pools is quite profitable.

For example; when there is a campaign or any sort of activities taking place at a specific location, a percentage of all \$SPT tokens that are earned by players during the campaign goes to the owner of the virtual land.

DISTRICT 3 - NFT MARKETPLACE

A marketplace is basically a center of commerce (buying and selling) and the NFT Marketplace is absolutely no exception. Through our platform, users can access the most amazing NFT deal for all categories of users. We offer a levelled ground for all creators whether newbie or established creators.

Creators - You can create NFTs and sell them to a ready consumer market.

Enthusiasts - Feed your eyes. And explore galleries of digital collectibles.

Collectors - You can find the rarest piece of work from both upcoming and renowned creators. Also, you can sell NFT collections from your portfolio.

INFLUENCER NFT REWARDS

There will be several models in which the NFT influencer rewards can be utilized and tailor-fit to their needs. SPORTREX understands that each influencer has their business model, and by using smart contracts and NFT they will be able to achieve their goals and simultaneously assist the platform.

The Sportrex Premium NFT

Sportrex NFT (SNFT) is the premium NFTs to be created and minted by Sportrex Creators. These NFTs will be **110,000** in total supply with a scheduled release of the NFT Collections in a Series of **10,000 premium collections** until the entire **110,000 NFTs** are minted within 24months. These NFTs will be designed in such a way that prices can not be sold below the market floor value.

The SPORTREX decentralized platform offers an unprecedented distribution model. To ensure that participants' tokens remain scarce and valuable, distribution will be controlled by a set of NFT trophies that can be bought and sold as sponsorship rights to the seasonal, as well as smaller match models.

These NFTs will have a significant portion of the supply locked inside of them, to be released in relation to final rankings by participants in SPORTREX tournaments. This will allow speculators to buy the NFT trophy and own the endorsement rights to the tournament. One month after release to the market the seasonal tournament trophies will be locked to their owner, they will have a final 3 days period in which concerned parties may send their private bids to the trophy owner.

SPT NFT STAKING VAULT

To ensure that users can have the most utility for their tokens there will be \$SPT staking vaults. These vaults will allow for users to lock up some of their \$SPT in various fashions for specific NFTs that may be anything from a new skin, a background, or maybe even a pet, or area effect.
