

The beneficial Metaverse news platform

Metaverse is a smart and convenient digital content distribution platform based on Blockchain technology.

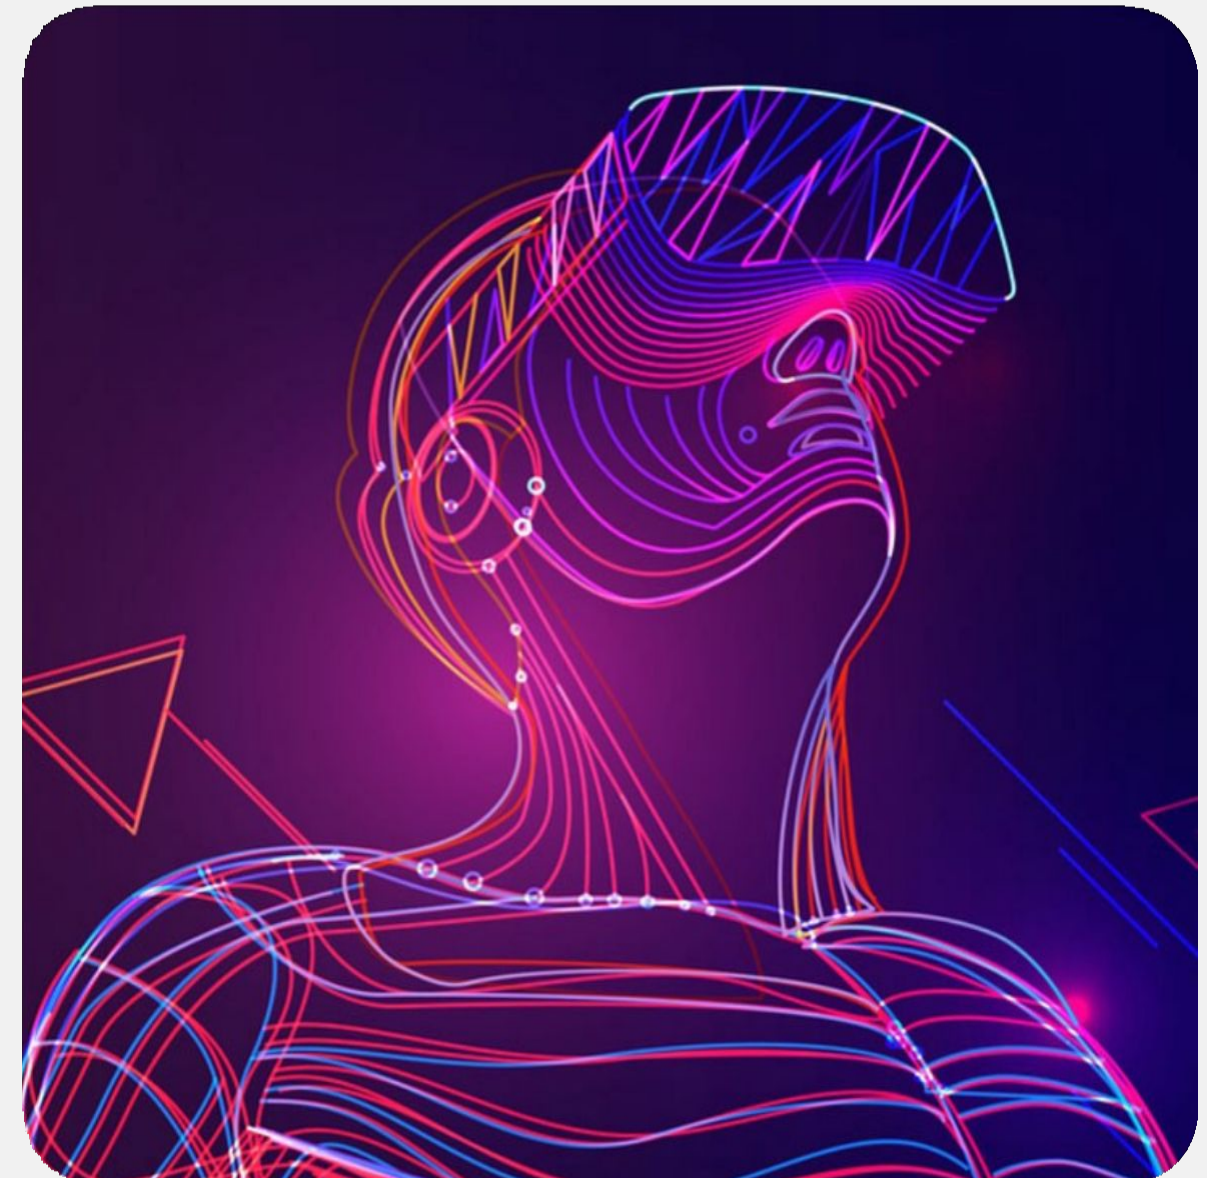

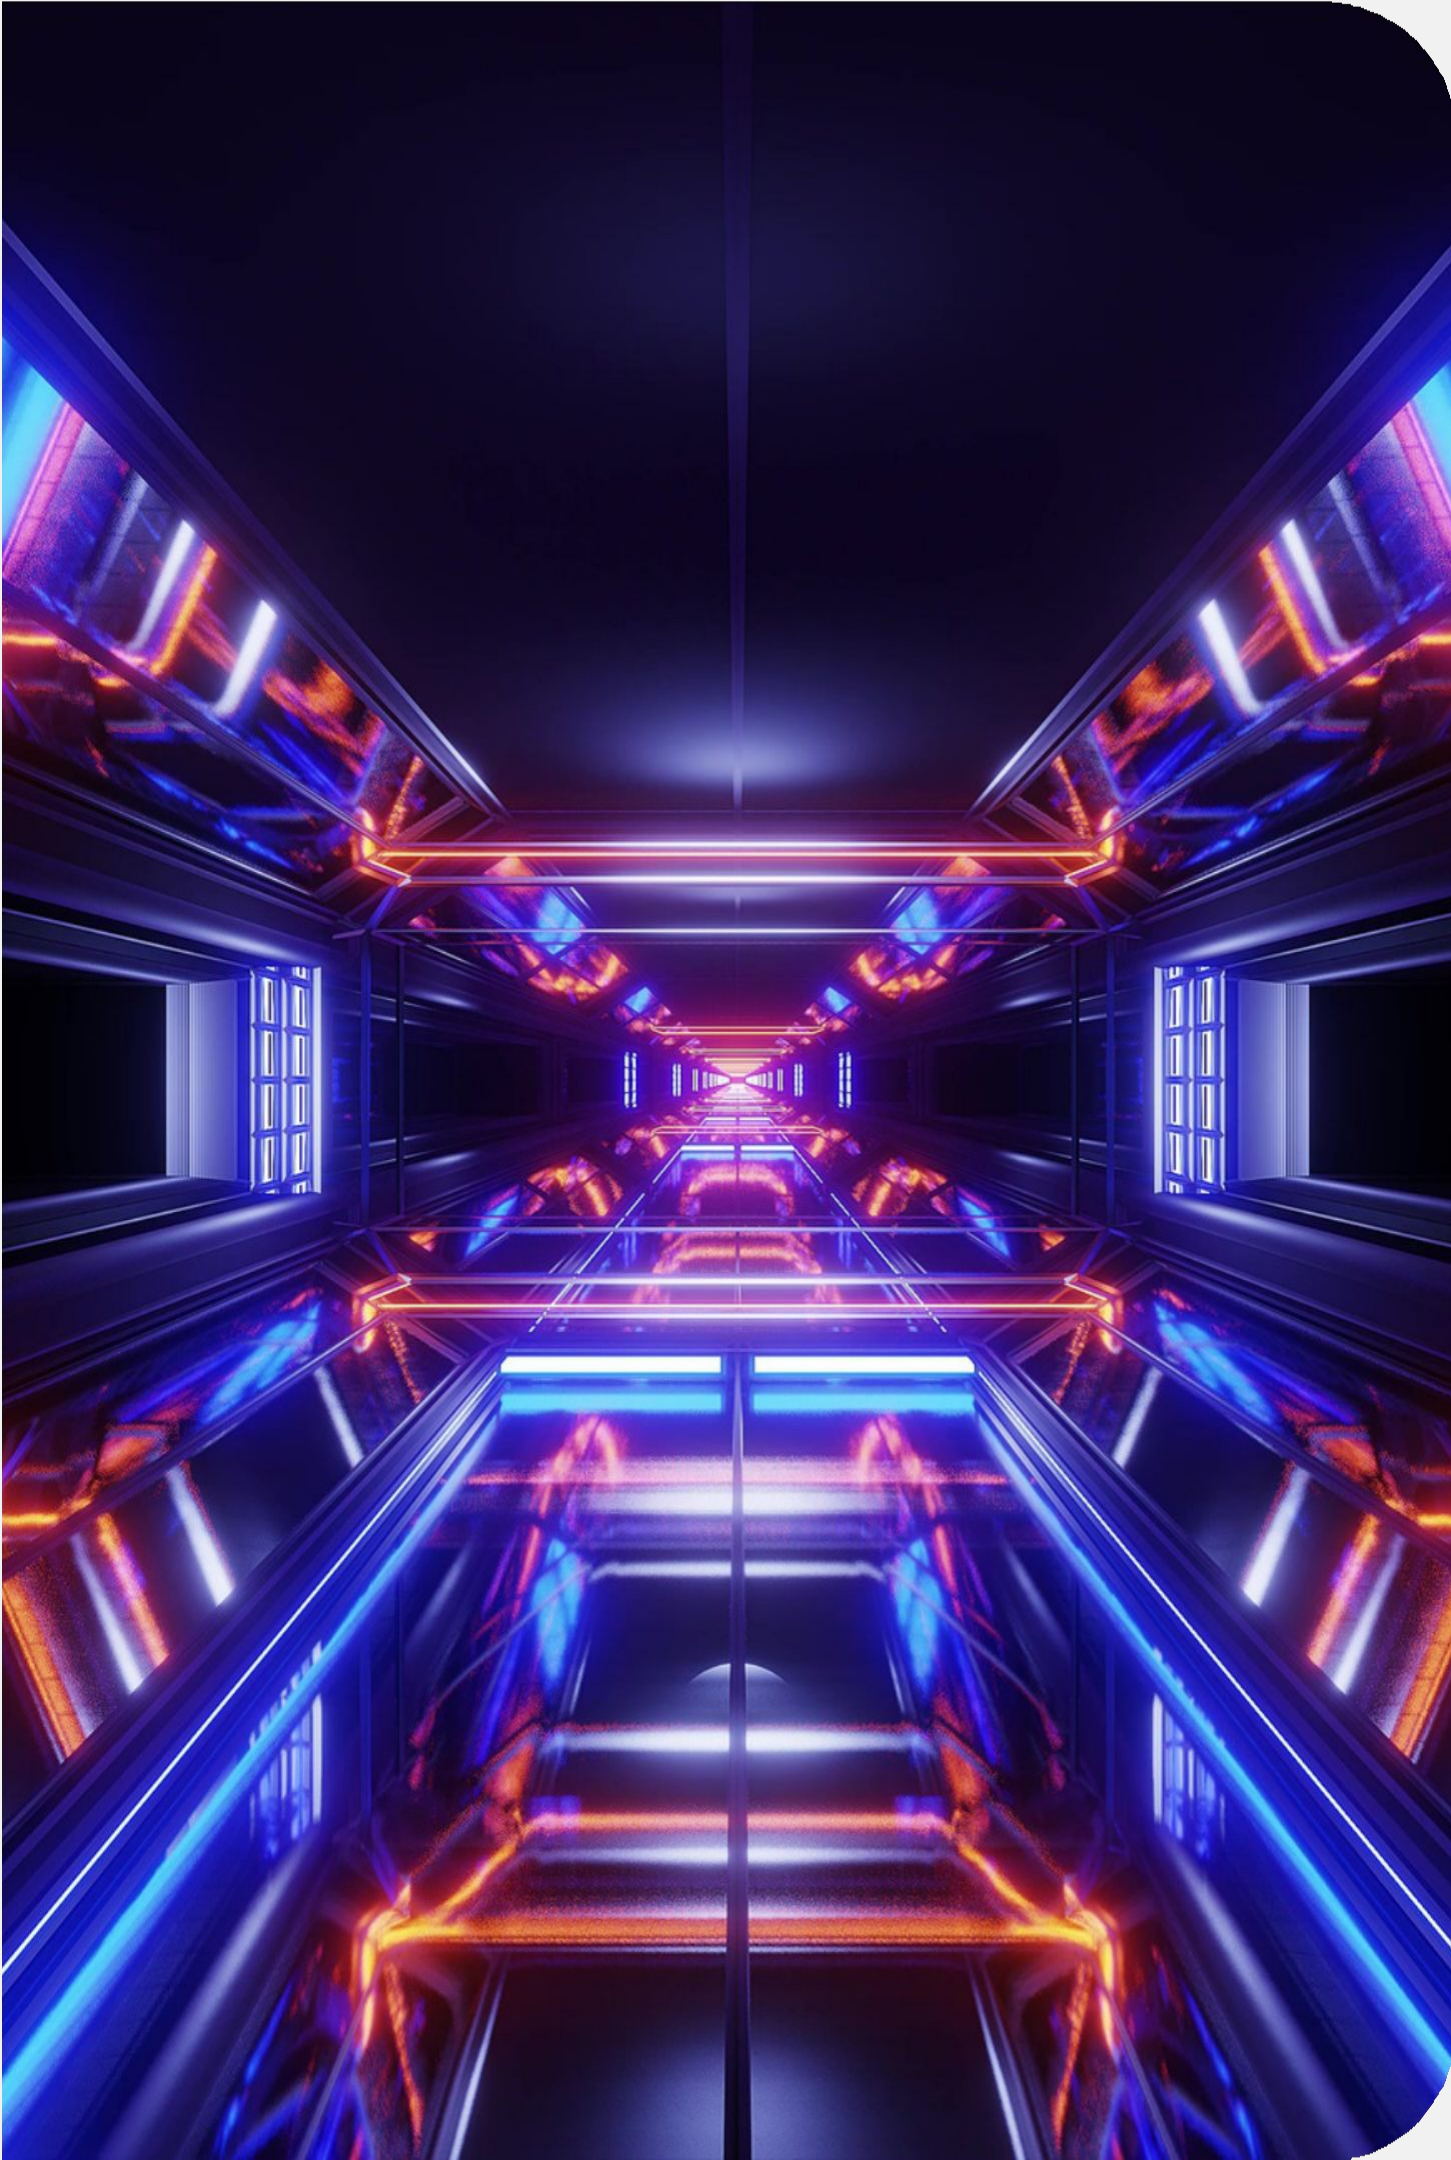

It promotes new types of content sharing and value transactions within the community and brings users together in a decentralized network.

Metaverse pr news distribution service

A good news platform needs to be unique in the Metaverse in order to be most effective.

The Metaverse is an advanced virtual world in which all real-world currencies and assets can be created, transferred, exchanged, and destroyed.

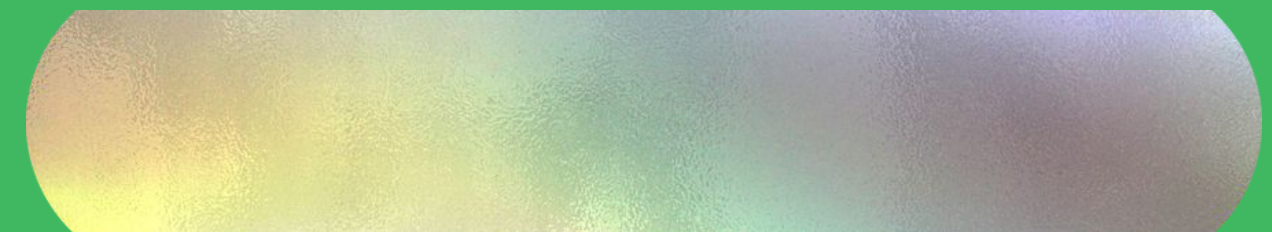

In these digital realms,
virtual economies are
established based on human
desires: users buy and sell
services within a system that
rewards the most productive
people.

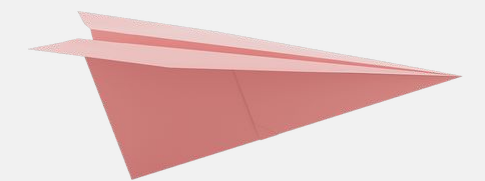

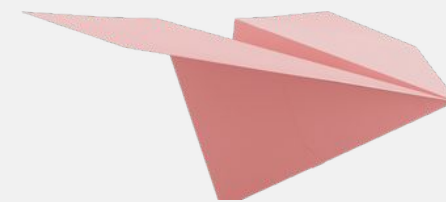

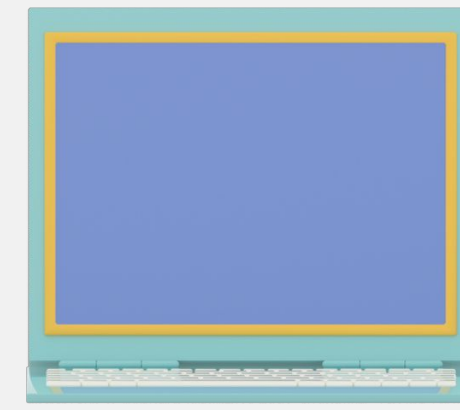

Pr services for Metaverse companies and startups

The top news platforms have to be trustworthy and provide information on the go.

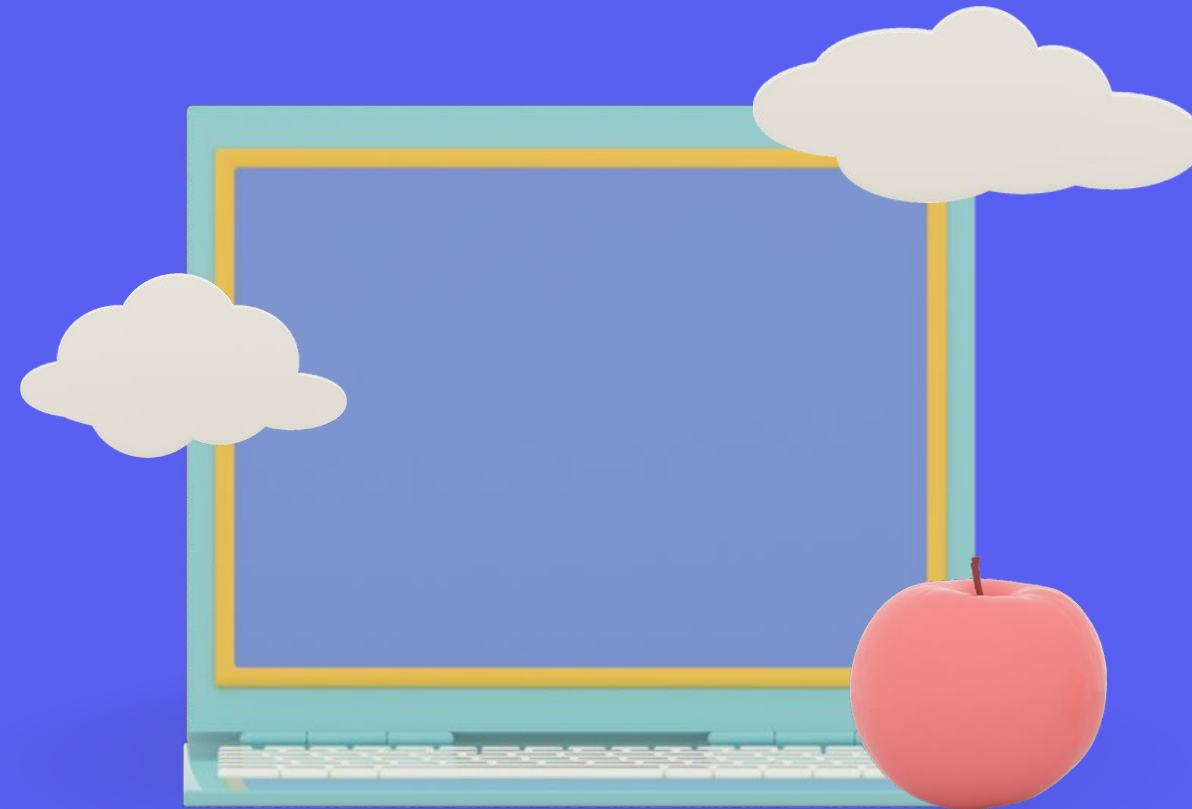

News platforms that update regularly and cover news that is vital for the Metaverse are the ones who make the news.

In recent decades,
the internet has
gone wild.
Although the early
days of the internet
were rather tame,
everything changed
with the rise of
social media.

Metaverse press news distribution service

Metaverse is a decentralized blockchain platform with a smart economic system, in which the digital asset (MDT) has the role of the value of the currency.

Metaverse provides
Metaverse companies
with a unique pr
service that meets
their specific needs.
