Well, i just registered... just for commenting bout this movie... i don't know what to say... I'm a big fan of Avatar: The

Legend of Aang... And i expected the movie would be great as well... But, it just. well i don't know... you should tell me...

Something bout the movie doesn't seem right for me... What i can't tell here, I've been expecting this movie since last year (since I've watch the trailer) but it turn out to be kinda disappointed...

The 3D also doesn't impress me at all... The fighting should be using the bending... Not using physical strength... Also, Appa is very ugly in this movie... It suppose 2 be cute...

The Last Airbender [2010] Full Movie online french. The Last Airbender [2010] Full Movie Online. One of the best films I have ever seen. Am not going to add spoilers but the film is in the typical style of many Asian films and it probably wont be appreciated by many. Superb effects are backed up by a strong storyline. As other people have said the dialogue is unfamiliar to western audiences which only makes it more appealing to the true martial arts film fans. Many real moves are expertly performed to "control the elements. I guess if you don't watch martial arts films or eastern cinema then give it a break but if you do then I would absolutely recommend it! Please do not let people put other people put you off.
