Free movie twister 5b1996 5d download no registration video. On the surface, Twister looks like any other 90s summer blockbuster. It comes from a time when the big summer tentpoles could draw millions with nothing but state-of-the-art special effects, likeable movie stars, and great marketing. Unlike most 90s box-office smashes however, Twister took this formula literally. Twister is nothing but actors and effects. And yet somehow, despite not having any story to speak of, despite not having a single coherent character arc, and despite not having an actual beginning, middle, or end, Twister is, against all odds, pretty enjoyable. Twister is about a team of storm chasers, including ones played by Bill Paxton and Helen Hunt. There is your plot summary. Yes there are evil storm chasers and ex-wives and stuff, but I must reiterate; Nothing actually happens in Twister. Well, nothing beyond storms and people chasing them. It is almost shocking how simplistic a film Twister is. It begins with a tornado, and keeps throwing tornadoes at the screen until the audience has got their fill. The script was written in part by Michael Crichton, my favorite author, and I prefer to imagine the final result is not his fault. Maybe I'm right, seeing as the elements associated with Crichton: the science of storm chasing and the professional love triangle, are simply along for the ride in a script that goes as follows: Storm happens, characters chase storm, characters rest, storm happens again, and repeat. But remember, Twister is enjoyable. Attribute that to those ever-present storms. Tornadoes have never looked cooler. The special effects from ILM were top of the line in 1996, and they still look remarkable. Tornadoes on land, tornadoes on water, tornadoes in the town, tornadoes in the fields, they all look like the real deal. They're massive, frightening, and spectacular in the truest sense of the word; they are a spectacle to see. It's all fun, of course, and director Jan de Bont doesn't hold back. You get your money's worth out of the action in Twister. Things may get repetitive after the fifth tornado pops up, but hey, nobody can claim that there aren't enough set-pieces. And de Bont stages the scenes well. We've seen plenty of CGI disaster flicks, but few of them have captured the thrill of being inside a powerful force of nature the way Twister does.

There throughout all the mayhem are Bill Paxton and Helen Hunt, two strong movie personalities, whose enthusiasm for the storm chasing material carries the picture. Let's face it, they don't do much acting here, but they are easy to get along with on screen. For two people asked to hold our hands through a parade of extreme weather, you'd be hard pressed to find better. Phillip Seymour Hoffman also has a small but colorful role as another storm lover, and he provides some needed humor. The cast sells their characters' passion for science, and it almost becomes infectious.

Twister is little more than a special effects demo reel. I'm serious. It allots virtually no time to story or characters, relying instead on a series of regularly scheduled tornadoes to stand in for a plot. The effects are great, and the characters around them are livelier than most, but I won't pretend like the movie doesn't flat out ignore some key elements. Twister is not very good, but by disaster movie standards, it is more effective than most. Its twisters are impeccably realized through some impressive CGI, and they are thrilling to behold. In some ways, I admire the decision to focus solely on the tornadoes. Sure, it runs the risk of getting stale, but at least nobody leaves Twister asking "Where were the storms. br> 67/100.
