Movie Online Uncut gets better. This was not a good movie. While the acting was fine up until the point Adam tried to cry talking to his girlfriend the movie was just bad. There is generally in every movie someone you like even in a show or movie about gangsters like Tony Soprano but not in this movie. The ending leaves you feeling like you just wasted you time and money. The soundtrack was indeed HORRIBLE just as others have commented. The movie kept you feeling anxious the whole time and uncomfortable. I don't really see the point of this movie nor is it one you would EVER want to see again. For that matter I don't see it being one you would tell a friend to go see, you might tell someone you don't like just so they will waste their time and money but not a friend.

This is the first movie I've ever walked out on and 1) I see a LOT of movies and 2) I'm 66. The character Adam S. plays is not charismatic; he is pathetic. We stayed 30 minutes so I can't review the rest of the movie. But I hope I helped others not lose this time in their lives.

Movie online uncut gems 2017. It really is that good. It's one of the two best movies I've seen this year, along with Parasite. And I can't make up my mind about which is the better film. Sandler in one of the year's best, it's really true.

The directors are very exciting young filmmakers. I loved their previous film, Good Time. Their style reminds me of Steven Soderbergh's work on Out of Sight, an underrated 90s comedy crime masterpiece, and Paul Thomas Anderson's early work, as well as the Pusher crime saga from Denmark. You'll get everything from wide, high-angle shots, zoom ins, zoom outs, quick cuts, long tracks, shaking cam. It's energetic film making by two gifted filmmakers.

It's that type of film that will hold your attention every second of the way. That's really the biggest compliment I can give the film. The 130 minutes go by quick. By the time the shocking conclusion came, I wanted it to keep going. I didn't want the movie to come to its conclusion. I have seen too many movies this year where I wished I could fast forward. And Adam Sandler is a big part of what makes everything work. He might not be the next DD Lewis, or John Malkovich, but he possesses that special king of charisma. He is such an amazing presence.

It's not a perfect film and there are aspects of the movie that I thought didn't quite work. Certain plot mechanisms and stretches of dialogue that didn't quite work with me. But in a movie that has so much going for it, that is forgivable. I do, though, believe that these filmmakers have yet to give us their best.
