

Gloveguard 900 Orange

DESCRIPTION

This Gloveguard 900 is a clip that keeps work gloves within easy reach. The Glove Guard clip is made from high-quality plastic, does not conduct electricity, and features two hooks: a smaller one that can be attached to a belt loop, harness, or clothing, and a larger one for securing gloves.

Using this gloveguard helps prevent loss, and reduces replacement costs. It also supports safer working practices by encouraging glove use, releasing safely if snagged, offering non-conductive protection, and allowing wet gloves to dry faster.

FEATURES

- ▲ Always within reach: easily attaches gloves to a belt, pocket, or jacket.
- ▲ Non-conductive material: suitable for safe use around electrical applications.
- ▲ Ergonomic shape for a good grip
- ▲ Secure clamping
- ▲ Less loss: keeps gloves secured and reduces the risk of misplacement.
- ▲ Improved safety: hand protection is readily available and used more consistently.
- ▲ Hi-visibility color

CERTIFICATIONS

APPLICATIONS

- ▲ Construction & infrastructure
- ▲ Heavy industry
- ▲ Logistics & transport
- ▲ Installation engineering
- ▲ Entertainment & events
- ▲ Landscaping & forestry
